

Material And Formal Research

Eva Maguerre

Fixed points of the fibreglass stool were defined in space and then connected or wrapped around by fiberglass soaked with dyed resin. New patterns and structures and thereby individual stools or tables originate from displacements of the fixed points and various wrap sequences. The resulting structures are extremely light though unexpectedly stable.

Material And Formal Research

Oskar Zieta

FiDU bench is a stable piece of furniture constructed of metal sheets, taking advantage of CNC-production and Free Inside Pressure Forming-technology, allowing an industrial mass-production with an individual, custom-made result. The result is a lightweight construction designed for semi-private and private space. Each product is an unique piece

Material And Formal Research

Michael Ubbesen

BauBike is constructed around the geometric shape of the square and the equilateral triangle. The design of the bike is stripped down to clean lines and raw material.

Dishwashing concept „Colo“ consists of trays that are used as storage rack, for carrying and as a main component of the dishwasher. For cleaning just put the tray in the provided sink and lower the cover. After washing, simply place the tray with the clean dishes on the wall again.

„Appeel“ is a virus spreading through interacting individuals.

Surfaces are covered by thousands of coloured stickers laid out in a grid.

Peeling a sticker off leaves a white spot in the grid, people hence start individually and collectively changing its appearance and begin putting them somewhere else creating new images.

Systems Contemplation

Sandberginstitut

Sandberg Institute will present a reconstruction of the Heinz Minki apartment. Around an old German stove ideas and objects related to home and daily life are shown. Many questions are raised about sustainability, re-use and the necessity of new design. The students experiment with many different materials and concepts.

A part of the presentation will be a movie in which the students are interviewed in their own houses about what domestic making means for them.

Systems Contemplation Mischer`traxler

A machine which functions through a mixture of mechanics and natural energy (solar). The machine creates a unique object each day depending on the amount of sunlight available.
